Taking Disconnected Pieces And Transforming Them Into A Whole !

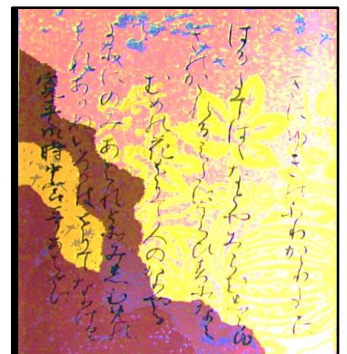

*“The experience of life that you and I have is pretty much a jigsaw puzzle in the box:
Day-to-day experiences of disconnected pieces that don't seem to justify
the efforts we make each day.” - Robert Adams, Photographer*

Collage is an art where you assemble various pieces of different materials (such as paper, photographs, cut outs from magazines / newspaper / packaging, fabric, feathers, wood, and other found objects) and attach them to a surface (such as paper, canvas, and wood) to create a new single picture that conveys a message, mood, or story.

Collage is from the French word “collér” --- “to glue”. In traditional 3-dimensional collage art cut and pasting with glue is the primary means of combining images. In digital collages you do a glue-less cut and paste of images – and can add glow, boxes, and other methods to set off images so they look 2-dimensional.

The first collages were made after the invention of paper in China in 200 BC. But it became an art in the 10th century when the Japanese poets – who were also calligraphers writing their texts on surfaces -- started to apply glued paper to decorate their poems.

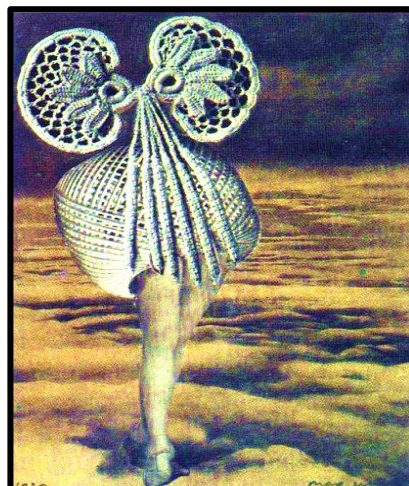

From the collected poems of Sosei-Hosh, 9th-10th Century:

Jump to the 20th century and the art period known as ‘Modern Art’ when some artists turned from making realistic art – *art that looked like real people and landscapes* --- to create wild images that totally came from their imaginations and experimentation.

HISTORY OF COLLAGES & EXAMPLES

Some of the Modern Art movements that embraced collage include [Cubism](#), [Dadaism](#), and [Surrealism](#), and in the mid-20th Century [Pop Art](#). As mass-produced images started to dominate culture and societal goals became a push to homogenize our differences, collage has become an expression of rule breaking and unconventionality, as well as an expression of the fragmentation and complexity of our modern world.

MARKETING & COMMERCIAL USE OF COLLAGE

Of course that which is fresh and fun in art will attract advertisers ! [Shutterstock's 2019 Creative Trends Report](#) indicated that marketing searches for 'contemporary collage' went up by an astonishing 1376% !

An offshoot of the collage is the 'mood board' (inspiration board) done in creative industries like fashion and interior design. A collage of concepts, visuals, materials, and colors is arranged to help stimulate brainstorming and to give an indication of your ideas to collaborators and clients.
